Level 2+

Seven of the most popular Praise and Worship titles of today are effectively presented in straightforward yet musically captivating arrangements. Carefully crafted with a minimum of technical challenges, ringers should readily enjoy preparing these selections in rehearsal. An added economic feature of this collection is the reality that at such a reasonable price, libraries are basically receiving four free titles, helping directors to be good stewards of their available funds. Beyond that pleasant bonus, however, these contemporary classics will be a wonderful addition to the music ministry your handbell choir provides for your congregation.
